Tam Thanh Nguyen

Backend Developer Intern

0343632524 tamthanhcmg@gmail.com https://github.com/NguyenTamThanhIUH Tan Binh, Ho Chi Minh City

PROFESSIONAL SUMMARY

Motivated software engineering intern with hands-on experience in Spring Boot and MySQL/MariaDB, and a solid understanding of client-server architecture and RESTful API development. Familiar with Docker, basic design patterns, and full-stack development using React. Strong problem-solving skills with the ability to understand technical documentation in English. Currently exploring DevOps practices with AWS and modern backend technologies, while seeking a backend-focused internship to grow professionally.

EDUCATION

Industrial University of Ho Chi Minh City Oct 2022 - Present

Major: Software Engineering | 4rd Year Student

GPA: 3.3/4.0 - Very Good

SKILLS

Programming Languages	Java (Core), JavaScript, TypeScript.
Backend	Spring Boot, JPA/Hibernate, Node.js (Express.js), RESTful APIs, WebSocket, JWT, Refresh Token.
Frontend	React, Redux Toolkit, Tailwind CSS, Bootstrap.
Database	MySQL, MariaDB, MongoDB, Redis (basic).
DevOps & Tools	Docker (basic), Git/GitHub, Postman, AWS (basic).
Architecture	SOLID Principles, Design Patterns, Microservices Architecture.

PROJECTS

ZELO - Messaging System Jan 2026 - May 2026

Full-Stack Developer | 5 members

GitHub: https://github.com/thienper/ZELO
Description: ZELO — Full-stack social app with real-time chat and media sharing for web and mobile.
Techstack: Node.js, Express, MongoDB (Mongoose), Socket.IO, JWT, Multer + Cloudinary, AWS SNS, Twilio, Nodemailer/Resend, Swagger UI, Axios, WebRTC, React, Tailwind CSS.
Responsibilities:

- Led ZELO full-stack architecture and secure JWT auth with protected routing.
- Shipped real-time communication (Socket.IO/WebRTC) and media pipeline (Multer/Cloudinary + SNS/Twilio).
- Delivered core social features (feed, comments, reactions) with scalable APIs.

CareerConnect - Job Search System Nov 2025 - Present

Backend Developer | 5 members

GitHub: https://github.com/khongtam12/career-connect-backend
Description: A career-connect platform that matches candidates with employers, streamlining jobs, applications, CVs, payments, and notifications through a single API Gateway.
Techstack: Java 21, Spring Boot/Cloud (Gateway, Eureka, OpenFeign, Resilience4j), JPA, PostgreSQL, MongoDB, Redis, Kafka, Docker, React + Vite, Tailwind, MUI/Radix, Axios, Zustand.
Architecture: Microservices, API Gateway, Service Discovery, Event-driven (Kafka), Database-per-service, Redis cache, Docker Compose.

Responsibilities:

- Established the microservices foundation and API contracts for Career Connect to enable parallel development.
- Delivered secure auth (Spring Security + JWT) with role-based access across Admin/Employer/Candidate.
- Built core services (users, companies, jobs, applications, CVs, payments, notifications) with resilient inter-service calls.
- Implemented Kafka-based async notifications and optimized data with PostgreSQL/MongoDB + Redis caching.

ACHIEVEMENTS

Received 2 scholarships over 4 years of university. Oct 2022 - Present
