Thai Phuoc Trong

AI Developer Intern

I aim to join as an AI Developer Intern where I can apply my knowledge of programming and machine learning while continuously learning from real-world projects.
In the long term, I aspire to become a skilled AI Developer, building practical AI solutions that enhance user experience, particularly in areas such as game development and intelligent systems.

HỌC VẤN

Đại học Duy tân

Ho Chi Minh City

EXPERIENCE

Graduation Project – 2D Top-down Shooter Roguelike Game Development

Duy Tan University (3/2024 - 6/2024)

Contributed as a Content Designer and Concept Artist in a game development team.
Designed gameplay concepts, characters, environments, and mission systems.
Developed user interfaces (HUD, Menu, Inventory) and edited a game trailer video.
Utilized tools such as Unity, Photoshop, Illustrator, and Premiere during development.
Strengthened teamwork, time management, and visual storytelling skills.

Gear Games

Challenge Game (2/2025 - 3/2025)

Gained hands-on experience and practical knowledge by working directly with Unity.
Improved learning ability and communication skills in a professional environment.
Observed and applied effective working methods, contributing to a more flexible and collaborative work environment.

SKILLS
