HUYNH DUY NGUYEN

Full Stack Developer (NodeJS)

0862463459 nguyenhuynh.463459@gmail.com https://github.com/nguyenit24 Ho Chi Minh City, Vietnam

OBJECTIVE

Highly motivated 3rd-year Information Technology student with a strong academic foundation (GPA: 3.5/4.0) seeking a Node.js Developer Intern position. Eager to leverage solid hands-on experience in full-stack JavaScript environments and building RESTful APIs to contribute to software development projects.

EDUCATION

Ho Chi Minh City University of Technology and Education (HCMUTE) 2023 - 2027

Major: Information Technology

GPA: 3.5 / 4.0

SKILLS

Backend Development	**Node.js, NestJS, ExpressJS, RESTful API Design, MVC Architecture, Event Loop Optimization.**
Frontend Development	**ReactJS, Bootstrap, HTML, CSS, JS, Typescript.**
Databases & Caching	**MySQL, MongoDB, Redis, SQL Server, Postgres SQL**
Security & Auth	**JWT Auth (Access/Refresh Token), Cryptographic Hashing (bcrypt), CORS Security Middleware.**
Developer Tools	**Git, GitHub, Postman, Docker Basics, Deployment (Vercel)**
AI	**OpenAI API (GPT Models), Google Gemini API, GitHub Copilot.**

PROJECTS

Movie Booking System (Group Project) 02-2026 - 04/2026

Full-Stack Developer (Node.js, ExpressJS, ReactJS, Redis, MongoDB, Cloudinary, JWT)

- Implemented secure authentication utilizing JSON Web Tokens (JWT), encrypted user credentials with Bcrypt, and added email OTP verifications.
- Developed a scalable online movie ticket booking platform utilizing the MERN stack with dedicated Client and Admin Dashboard interfaces.
- Engineered the Booking Flow subsystem, enabling real-time seat selection and dynamic showtime handling via custom API endpoints.

Ecommerce Tech Store (Personal Project) 4/2026 - 6/2026

Full-Stack Developer (Node.js, ExpressJS, ReactJS, Redis, MongoDB, Cloudinary, JWT)

- Built a complete end-to-end commercial tech-device web application allowing users to browse, manage, and purchase items seamlessly.
- Designed and deployed core Cart & Checkout backend business logic, correctly calculating dynamic price totals, voucher adjustments, and promotional rules.
- Leveraged Redux Toolkit for structured global state management across critical frontend user sessions and transactional flows.
- Incorporated file upload functionalities using Multer middleware connected with Cloudinary API for secure remote asset storage.
- Standardized and documented all functional application endpoints via comprehensive Postman API collections
