981/26 Cách Mạng Tháng Tám Phường Tân Sơn Nhất Quận Tân Bình

EDUCATION

Bachelor of Information Technology

11/2021 - 11/2025

Đại học FPT

- Completed core courses in **Web Development, Database Systems, and Object-Oriented Programming**
- Participated in semester projects following basic Agile and teamwork practices

CAREER OBJECTIVE

Software Engineering student focused on learning **Python Backend development** and relational databases. Passionate about building applications using an **AI-assisted workflow** to speed up development. Currently able to design basic APIs and use **Swagger UI** for testing, while planning to expand into frontend development in the future. Seeking a Dev Intern position to gain practical experience, sharpen logical thinking, and contribute to real-world projects.

WORK EXPERIENCE

FullStack Developer (Personal Project) -

E-Commerce-System-AI (Personal Project) | Python & Webapp

- Designed and deployed a comprehensive backend system using Python and RESTful APIs to manage data flows from user roles to core business logic.
- Structured and optimized relational database schemas to ensure seamless, high-performance data delivery between backend services and UI integration.
- Integrated **Swagger UI** to fully document, visualize, and execute automated manual testing directly via the browser.
- Collaborated with AI tools (Claude, ChatGPT) as a development co-pilot to optimize query performance and ensure clean, maintainable architecture.
- Prioritized building a rock-solid backend architecture first, ensuring all logic is stable before shifting focus to active frontend development.

FullStack Developer | Angular & TypeScript -

Sale E-Commerce System(Personal Project)

- Designed a modular architecture utilizing **Angular Modules** and **Lazy Loading** to significantly optimize initial load times and improve scalability.
- Managed complex asynchronous data flows using **RxJS Observables** and **BehaviorSubjects** to achieve real-time synchronization of inventory and cart states.
- Developed dynamic dashboards leveraging **Reactive Forms** for robust data validation, error handling, and seamless product management.
- Optimized component interaction using Input/Output decorators and Angular Services, maintaining a highly decoupled and clean codebase.
- Implemented **HTTP Interceptors** to centralize API authentication (**JWT**) and global error handling for a secure, consistent user experience.

TECHNICAL SKILLS

Frontend JavaScript (ES6+), Angular, React.js (Ready for integration), HTML5, CSS3, Responsive UI, TypeScript, **React Native**

Frameworks/Libraries FastAPI, Tailwind CSS, Ant Design.

Backend & Database Python (FastAPI), Java Spring Boot, RESTful API Design, Swagger UI, PostgreSQL, MySQL.

Tools & Productivity Git, GitHub, AI-assisted Development (Claude, ChatGPT, Copilot).

ACTIVITIES

Volunteer **07/2023 - 08/2024**

Microsoft 365 Training Program

- Supported learners in utilizing M365 applications and assisted in organizing collaborative online training sessions.

Driving License **1/2026 - 5/2026**

Department of Transportation

Class B2 Driver's License (Fully authorized to operate both manual and automatic transmission vehicles; ready for flexible travel or operational tasks if required).
