SKILLS

Language & Framework

Flutter, Dart

State Management

BloC, Cubit, Provider

Architecture

Clean Architecture, Layered Architecture

Networking

REST API, Http, Dio, Retrofit, WebSocket

Local Storage

Shared Preferences, Secure Storage, Hive, Isar

Tools & Platform

Git, GitHub, GitLab, Figma

Methodology

Agile Scrum

CERTIFICATION

🏆 TOEIC 630 / 990 (2025)

INTERESTS

⚽ Football 🎱 Billiards 🎵 Music

Doan Thanh Trung

Flutter Developer

Flutter Developer with **1 year of hands-on experience** (03/2025 – 03/2026) in large-scale product environments at KiotViet Technology. Experienced in end-to-end feature development, REST API & WebSocket integration, and Clean Architecture implementation. Comfortable working in Agile Scrum teams of 17–20 people, with a proactive attitude toward code reviews and continuous improvement.

WORK EXPERIENCE

KiotViet Technology Company

03/2025 – 12/2025

Flutter Developer — Product App (PST Team)

Team size: 20 | Agile Scrum | Hanoi, Vietnam

- Built UI screens and integrated REST APIs for new product modules following BA specs and Figma designs.
- Implemented **multi-language support (i18n)** to extend the app to multiple markets.
- Collaborated with the mobile team to analyze and resolve complex technical issues.
- Participated in peer code reviews and provided actionable feedback to raise team-wide code quality.
- Consistently applied **Clean Architecture** across all assigned modules to ensure maintainability.

KiotViet Technology Company

12/2025 – 03/2026

Flutter Developer — KVOnline (Mini App)

Team size: 17 | Agile Scrum | Hanoi, Vietnam

- Developed and integrated the **Quick Message** feature within the mini-app and embedded it into the main application.
- Implemented **WebSocket** for real-time messaging, achieving low-latency communication.
- Applied **Isar Database** for local data persistence, optimizing the offline experience.
- Integrated mini-apps into the main application using a **modular architecture** approach.
- Refactored code and improved UI/UX based on QA and Design team feedback.
- Conducted regular peer code reviews to uphold code quality standards across the team.

AI-ASSISTED DEVELOPMENT

Tools

GitHub Copilot

Cursor

Practical Application

- Created custom **Cursor Rules & Copilot Instructions** aligned with project architecture (Clean Architecture, naming conventions) to generate production-ready code from the start.
- Used AI to accelerate boilerplate generation (BloC, repository, datasource layers), reducing time-to-feature significantly.
- Leveraged AI for debugging assistance, refactoring suggestions, and simplifying complex business logic.

EDUCATION

University of Economics – Technology for Industries

Bachelor of Information Technology | 2021 – 2025
