ABOUT

As a Software Engineering student who has completed the academic program at Industrial University of Ho Chi Minh City, I am passionate about programming and eager to dedicate my energy and contribute meaningful value to the company. I have knowledge of both frontend and backend development. I am currently seeking opportunities to further enhance my technical skills, contribute to real-world projects, and grow as a software developer in a professional environment.

SKILLS

React Native
Next.js
TypeScript
Java Spring Boot
Node.js
PostgreSQL/MySQL
MongoDB
Github
Postman/Swagger
Docker
Redis
RabbitMQ
Figma

SOFT SKILLS

Problem Solving
Project Management
Teamwork
Critical Thinking
Self-learning
Communication

EDUCATION

Software Engineering

2021 - 2026

Industrial University of Ho Chi Minh City

As a Software Engineering student who has completed the academic program at Industrial University of Ho Chi Minh City, I am passionate about programming and eager to dedicate my energy and contribute meaningful value to the company. I have knowledge of both frontend and backend development. I am currently seeking opportunities to further enhance my technical skills, contribute to real-world projects, and grow as a software developer in a professional environment.

WORK EXPERIENCE

Software Developer Intern

06/2025 - 12/2025

T4TEK Co., Ltd.

- Developed e-commerce systems and landing pages using Odoo, customized modules, built frontend features, and collaborated on UI/UX improvements while gaining experience in ERP development.

PROJECTS

Role: Back-end Developer

01-2025 - 05-2025

Zalo-like Messaging Application

Developed a full-stack real-time messaging application using Node.js, including frontend development, RESTful APIs, user authentication, and message handling, with a focus on real-time communication and backend concepts.

Github: https://github.com/DoMinhHHung/iTalkConnect_CN

Role: Full-stack Developer

6/2025 - 6/2025

Mini Trello Task Management System

Built a Trello-inspired collaborative task management system using Node.js, implementing real-time multi-user collaboration with RESTful APIs for board and task management, and enabling synchronized updates such as drag-and-drop and status changes across users.

Github: <https://github.com/DoMinhHHung/MiniTrelloApp>

Role: Full-stack Developers

1/2026 - 5/2026

Development Of A Mobile Music Streaming With Intergrated Recommendation And Music Sharing

- Built a full-stack microservices system for music streaming and recommendation
- Designed scalable backend architecture using Spring Boot RESTful services
- Implemented a machine learning-based recommendation engine in Python
- Developed cross-platform client applications using React Native (mobile) and Next.js (admin dashboard)
- Coordinated multiple services through API-based distributed architecture
