

HOANG HUU THUAN

BACKEND DEVELOPER

University of Transport Ho Chi Minh City (2022 – 2026)

GPA : 3.21 /4.0

0787776959

hoanghuuthuan157@gmail.com

Ho Chi Minh City, Vietnam

ABOUT ME

Motivated and detail-oriented IT student with hands-on experience in fullstack web development and backend engineering. Skilled in Java, Spring Boot, React, and modern software architecture. Strong ability in system analysis, API development, database design, and secure authentication implementation. Passionate about building scalable applications and delivering clean, maintainable code.

SKILLS

- Java, Spring Boot, Spring Security, JPA, Hibernate
- RESTful API design & Backend Architecture
- MySQL, PostgreSQL
- React, TypeScript
- Git, Postman, Docker, Jira, Linux
- Languages: English (able to read and understand technical documents effectively)

EXPERIENCE

Backend – Data Labeling Support System

3/2026 – Present

- A data labeling platform that helps teams manage annotation tasks, review workflows, and export datasets for machine learning training.
- Secured Admin, Manager, Reviewer, and Annotator APIs using Spring Security, JWT authentication, and role-based access control (RBAC).
- Designed and implemented task assignment workflows, enabling managers to distribute annotation tasks among annotators.
- Built annotation review and approval workflows supporting submission, approval, and rejection processes.
- Developed dashboard APIs and statistical reports to track annotation progress and project performance.
- Implemented dataset export functionality supporting YOLO, COCO, and Pascal VOC formats.
- Designed RESTful APIs and database schemas for task, annotation, and user management.

Fullstack – Bookstore E-commerce

10/2025 – 12/ 2025

- Built an online bookstore system with book search, browsing, shopping cart, and order management features.
- Designed MySQL database schema and developed RESTful APIs for books, categories, carts, orders, and user management.
- Implemented Spring Security and JWT-based authentication and authorization for secure access control.
- Integrated VNPay payment gateway for online checkout and payment processing.
- Applied layered architecture, DTO mapping, request validation, and global exception handling to improve maintainability and reliability.
- Integrated Google Gemini API to build a conversational chatbot that assists users with book-related inquiries.
- Implemented order confirmation email notifications using Spring Mail.
- Utilized JPA/Hibernate for database access and entity relationship management.

Android Intern – IriTech

4/2025 – 6/2025 – Ho Chi Minh City, Vietnam

- Developed a student attendance Android application using Java.
- Integrated IriTech biometric SDK for user identification and attendance tracking.
- Assisted in testing, debugging, and application enhancement.
