Khong Van Tam

Software Engineer Intern

(+84) 0347624338 vtam110604@gmail.com https://github.com/khongtam12 Go Vap, Ho Chi Minh City

OBJECTIVE

Seeking a Software Development Internship where I can apply my technical knowledge, gain practical experience, and learn from experienced mentors. Eager to contribute to real-world projects, enhance my technical and problem-solving skills, and continuously grow as a software engineer in a professional environment.

SKILLS

Programming Languages:	Java, JavaScript, TypeScript
Backend & Architecture:	Spring Boot, Spring Security, Node.js (Express.js), RESTful APIs, Microservices, Resilience4j, JWT, OAuth2, Design Patterns
Frontend:	React.js, React Native, Redux Toolkit, Tailwind CSS, Zustand
Databases & Cache:	MySQL, MariaDB, MongoDB, PostgreSQL, Redis
DevOps & Tools:	Docker (Basic), Git/GitHub, Postman, AWS (Basic), Jira

PROJECTS

Career-Connect - Recruitment Platform Feb 2026 - Present

Full Stack Developer & Team Lead | 5-member Team | Microservices-based System

Github:

- Backend: https://github.com/khongtam12/career-connect-backend
- Frontend: https://github.com/khongtam12/career-connect-frontend

Tech stack: Java Spring Boot, Google OAuth2, Spring Cloud, Eureka, OpenFeign, Kafka, Resilience4j, PostgreSQL, Redis, Docker, React.js, AWS S3, VNPay, OpenAI/OpenRouter

Responsibilities:

- Developed backend services for a recruitment platform, covering core features such as user authentication, CV management, job posting management, application workflows, service package purchasing, payments, notifications, and automated email delivery.
- Implemented authentication and authorization using **Spring Security**, JWT, and Google OAuth2, with role-based access control for Candidate, Employer, and Admin.
- Designed inter-service communication using **OpenFeign and Kafka**, combined with **Resilience4j** patterns such as retry, fallback, and circuit breaker to improve reliability in a distributed system environment.
- Implemented API Gateway, Eureka Service Discovery, **rate limiting, and caching** to control traffic, enhance security, and improve system performance.
- Applied the **Strategy Pattern** to implement the payment workflow for VNPay integration, and developed an AI-powered CV-Job Matching feature using LLMs (OpenRouter/OpenAI) to evaluate candidate-job fit, analyze skill gaps, and generate interview recommendations.
- **Automated CI/CD pipelines for 5+ microservices** using **GitHub Actions & Docker**, streamlining building and containerized deployment processes.

Zola Zola - Social Chat Platform Jan 2026 - Present

Full Stack Developer | 5-member Team

Github: https://github.com/khongtam12/zalo_clone

Demo: https://zola14.ddns.net/

Tech stack: NestJS, TypeScript, MongoDB, Redis, Socket.IO, React.js, Expo React Native, Redux Toolkit, AWS S3, Docker, WebRTC

Responsibilities:

- Developed backend, web, and mobile features for a cross-platform messaging application, covering real-time chat, conversation management, social feed, and story workflows.
- Built search capabilities including conversation search, message search, and conversation classification to improve information retrieval and user navigation.
- Implemented conversation management features such as pin/unpin, hide/unhide, mute/unmute, delete conversation, self-destruct messages,and unread tracking.
- Developed social features including story posting, post reactions/comments, feed filtering, and synchronized UI behavior across web and mobile clients.

EDUCATION

Industrial University of Ho Chi Minh City Oct 2022 - Present

Major: Software Engineering | 4th Year Student

GPA: 3.6/4.0

HONORS & AWARDS

Scholarship (6 semesters)	Oct 2022 - Present
TOEIC Certificate – Score: 555/990	Jun 2026 – Jun 2028
