CAREER OBJECTIVE

Highly motivated IT graduate with over 1 year of practical .NET backend experience in production environments. Proficient in RESTful APIs, SignalR, and database. Seeking a Backend .NET Developer Fresher position to leverage my system design skills in building scalable solutions, with a strong drive to advance to a Junior Developer role within a year.

EDUCATION

08/2022 – 06/2026	Hanoi University of Natural Resources and Environment Bachelor of Information Technology GPA: 3.71 / 4.0 2023 [Scientific Research] Student Accommodation Review and Development Website — Pass 2024 [Scientific Research] AI Chatbot System Integrated with Augmented Reality (AR) for Personalized Customer Experience — Distinction 2025 [Scientific Research] Smart Healthcare System Integrated with Blockchain for Anti-Counterfeit Medicine and AI Assistant for Primary Diagnosis — Excellent
-------------------	--

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL

Backend, APIs & Architecture: ASP.NET Core Web API, RESTful APIs, JWT, Policy-based Authorization, Role-based Authorization, Hangfire, SignalR, Semantic Kernel, Middleware, Dependency Injection, Webhooks, Message Buses, NPOI, EPPlus, Magick.NET

Databases & Caching: Microsoft SQL Server, Entity Framework Core, LINQ, Global Query Filters, Redis Cache

Frontend: React.js, Next.js, Tailwind CSS, Ant Design

Tools & Soft Skills: Git, GitHub, Postman, Figma, Problem-solving, Team collaboration

WORK EXPERIENCE

	Backend Developer - TECHBYTE Technology Investment Company Limited
03/2025 – 05/2026	- Executed the full software development lifecycle from architecture design to final implementation - Conducted code reviews and enforced SOLID principles to ensure maintainability and system security - Resolved complex system bottlenecks to maintain high availability and seamless data synchronization - Collaborated with cross-functional teams to align technical solutions with core business goals

PROJECT EXPERIENCE

Sep 2025 – Dec 2025

Backend Developer – TECHBYTE Technology Investment Company Limited

FATS – Smart Personal Finance Platform

- Integrated JWT for secure authentication and engineered an event-driven team management module with asynchronous data initialization using ASP.NET Core background services
- Built high-performance bulk Excel data import workflows utilizing NPOI for direct stream reading and EF Core for optimized deduplication and bulk inserts
- Designed an automated subscription queue system using Hangfire background jobs and message buses to process renewals and unlock premium features
- Integrated AI vision capabilities using Semantic Kernel and Magick.NET for automated image conversion and structured JSON data extraction

(fats.vn)

Dec 2025 – Feb 2026

Backend Developer – TECHBYTE Technology Investment Company Limited

BizDoctor – AI-Powered Business Advisory Platform

- Developed high-performance RESTful APIs using ASP.NET Core and EF Core to process financial roadmaps and ESG metrics
- Implemented secure user authentication and API authorization flows using JWT
- Secured multi-tenant architecture using Policy-based Authorization and EF Core Global Query Filters for strict data isolation
- Integrated Hangfire to automate background jobs and optimized investor matching using Redis cache
- Engineered fast bulk Excel I/O via EPPlus, implemented real-time AI streaming using SignalR, and developed Webhooks for payments
