Ngo Quang Phuc

Software Developer

0962447792 ngophuc2911@gmail.com https://portfoliocuaphuc.netlify.app/ District 12 ,Ho Chi Minh City

CAREER OBJECTIVE

Software Developer with hands-on experience in building full-stack web applications using React.js, Next.js, Node.js, and Express.js. Strong in developing responsive user interfaces, integrating APIs, and delivering end-to-end features.
Interested in developing e-commerce systems, optimizing user experience, and applying modern technologies (including AI tools) to improve product performance and business efficiency.

WORK EXPERIENCE

Digitech Solutions 6/2025 - 12/2025

Position : Intern Frontend Developer

Experience Description:
• Contributed to end-to-end frontend development by building new features and enhancing existing modules based on evolving requirements
• Developed responsive and scalable user interfaces using React.js and Next.js, emphasizing clean architecture and reusable components
• Integrated RESTful APIs and optimized client-side data flow to improve performance and user experience
• Identified and resolved bugs, ensuring stable application behavior and on-time feature delivery
• Collaborated in an Agile team, actively participating in code reviews and iterative development processes
• Maintained UI/UX consistency by aligning implementation with design specifications and product feedback

SKILLS

Frontend	HTML, CSS, JavaScript (ES6+),React.js, Next.js , React Native
State Management	React Query, Redux Toolkit, Zustand
UI / Styling	Tailwind CSS, Shadcn UI, Ant Design
Backend	Node.js, Express.js, MongoDB, SQL (MySQL)
Others	REST APIs, Socket.IO, Git/GitHub, Postman, Agile/Scrum
AI Tools:	Cursor,Claude,Gemini,ChatGPT, GitHub Copilot

PROJECTS

Real-time Chat Application 03/2026 - 05/2026

Role: Frontend Developer

Technologies: React.js, TypeScript, Node.js, Express, Socket.IO, MongoDB, Zustand, React Hook Form, Zod, Tailwind CSS, Shadcn UI
Description:
Built a full-stack real-time chat application inspired by modern messaging platforms, supporting instant messaging, media sharing, and responsive user experience.
Key Contributions:
• Built the entire application independently, covering frontend, backend, and real-time communication
• Developed responsive UI using React and Tailwind CSS, with state management via Zustand
• Designed and implemented RESTful APIs for authentication, conversations, and messaging
• Implemented real-time features using Socket.IO (message delivery, typing indicators, online status)
• Applied JWT authentication and form validation with Zod and React Hook Form
• Improved performance with optimized message loading (infinite scrolling)

Learning Outcomes: Strengthened understanding of real-time systems, WebSocket communication, API design, state management, and performance optimization through full-stack implementation.

MegaTrip – Travel Booking Platform 9-2025 - 12-2025

Role : Full-stack Developer

Technologies: Next.js, TypeScript, Tailwind CSS, Shadcn UI, React Query, React Hook Form, Node.js, Express, MongoDB
Description:
Developed an all-in-one travel booking platform supporting flights, bus trips, and tour packages, including both customer-facing features and an admin management dashboard.
Key Contributions:
• Developed end-to-end features across frontend, backend, and API integration
• Built responsive, SEO-friendly interfaces using Next.js App Router and reusable components
• Implemented booking workflows with validation and error handling
• Designed and developed RESTful APIs with Node.js, Express, MongoDB, and JWT authentication
• Integrated payment systems (Stripe, VNPAY) and external services (Nodemailer)
• Built admin dashboard with CRUD functionalities for services, orders, users, and CMS content
• Managed server state and API requests using React Query and Axios interceptors
• Integrated AI chatbot to enhance customer support and user experience
Learning Outcomes:
Gained hands-on experience building a full-stack production-style system, including booking flows, authentication, payment integration, admin management, and API design.
