NGUYEN PHU HAI

FullStack Developer

0394468859 14/03/2004 hainp143.work@gmail.com Thanh Xuân, Hà Nội

SKILLS

Backend: Java core, Spring, Python, FastApi, Django, RESTful API
Frontend: ReactJS, NextJS, TypeScript, Flutter
Database: MySQL, PostgreSQL, OracleSQL, SQLite3, MongoDB
Tools: Git/GitHub, Postman, WebSocket, Redis
English: Able to read technical documentation

EDUCATION

University Of Transport Technology (UTT) *9/2022 - 7/2026*

Information technology

GPA : 3.2

Bachkhoa Aptech *6/2024 - 12/2024*

Java Web FullStack

Grade: Distinction

WORK EXPERIENCES

Onedot - Fullstack 2/2026 - 6/2026

Tech stack: Java core, Springboot, Hibernate, JPA, Thymeleaf, Postgresql, Flutter , ReactJS

- Developed a multi-level insurance sales management platform, supporting hierarchical communities and commission structures.
- Contributed to the development of a cross-platform web application for managing workshops, utilities, and employee operations.
- Designed and implemented an SEO-optimized landing page to promote insurance products, featuring comprehensive contract details
- Improved web application performance by optimizing query execution and implementing caching strategies.

TC Group - Fullstack 2/2025 - 2/2026

Tech stack: ReactJs, NextJs, TypeScript, Tailwind, Django, Redis, ORM

- Developed a self-service kiosk system for healthcare services.
- Implemented user interfaces for CCCD verification to retrieve patient information.
- Built features for service and room selection, booking, queue number generation, payment processing, and receipt printing.
- Contributed to the development of a document-based Q&A chatbot platform.
- Built admin interfaces to add, edit, and manage documents, domains, prompts, and UI configurations.
- Implemented automated web document crawling and integrated Redis caching for performance optimization.
- Collaborated on JWT-based authentication to enhance system security.
- Supported CI/CD deployment pipelines using Jenkins to ensure secure and efficient system delivery.

PROJECTS

PisPhim (Personal Project) 3/2026 - 6/2026

Role: Fullstack developer

Tech stack: NextJs, Django, PostgreSql, Aistudio Api, JWT , ORM, Cloudinary

- Built a movie streaming platform with Next.js 16 (SSR) and Django REST, supporting HLS (M3U8) playback and multi-server fallback.
- Designed 20+ PostgreSQL models and implemented JWT auth with role-based access (User/Admin), rating, threaded comments, and resume-watching.

- Optimized performance with Redis caching, API rate-limiting, and a cron-based trending pipeline (Top 7/30 days).
- Developed an Admin Dashboard for movie/episode CRUD, IMDb metadata sync, ad management, and an integrated AI chat widget.

TC_Chatbot (Company Project) 8/2025 - 2/2026

Role: Fullstack Developer

Tech stack: NextJs, Django, JWT, Redis, Selenium, ORM

- Developed a chatbot interface for Q&A based on domain name.
- Developed a management interface and logic for adding documents to the AI, and refine the chatbot interface.
- Built a mechanism for automatically retrieving web documents using Selenium.
- Speed limiting and multi-threading automation with Redis.
- Use Google AI to retrieve the provided document and provide a response
