- Automation:** n8n, Make.
- Other:** Git, GitHub.
- Soft Skills:** Teamwork, Communication, Problem-solving, Adaptability, Leadership, Critical thinkin, Self-learning.

PROJECT

GemForce

<https://gem-forge-pink.vercel.app/>

- GemForge is a web app that creates "Gemini Gems" — custom AI system instructions — quickly, without any prompt-engineering experience.
- The app was built as a passion project and runs entirely on Google's Antigravity AI assistant.
- Users simply describe their needs; GemForge automatically generates production-ready system instructions using the T.C.R.E.I framework.

My Portfolio

<https://github.com/CThawngs/Portfolio>

- Chi Thang Portfolio is a fully automated, AI-powered CMS that converts a Notion database into a live portfolio website with zero code required for content management.
- Add a project in Notion and click a button to publish; an AI bot running on GitHub Actions translates the content into English and Vietnamese.

WORK EXPERIENCE

Google

2026 - PRESENT

Google Student Ambassador Trainer

- Spearheaded GenAI workshops across HCMC universities, delivering Prompt Engineering training and driving AI adoption for 500+ diverse students.
- Designed and configured specialized AI Agents to automate tasks and optimize workflows for end-users.
- Deployed n8n automation workflows for email systems while processing and managing operational datasets for 500+ participants.
- Collaborated via Google Workspace/Office 365 and integrated AI tools to automate reporting, significantly accelerating project delivery.

Apps Cyclone

2025 - 2025

Frontend Developer Intern

- Learn and use ReactJS to develop website interfaces based on existing Figma designs.
- Build a to-do list website with basic CRUD functionality using ReactJS.

TBay

2025 - 2025

WordPress Developer Intern

- Learn to design websites using WordPress.
- Building an e-commerce website.
