

NGUYEN THANH LUAN

AI Engineer Intern

CONTACT

- 01/02/2004
- 0389097037
- luannnguyen01022004@gmail.com
- <https://github.com/ThanhLuan04>

SKILL

Programming Languages

- Java (OOP, desktop application development, CRUD operations)
- Python (Machine Learning & Computer Vision: PyTorch, TensorFlow)

Database

- SQL Server
- Relational Database Design
- Writing complex SQL queries

Tools & Platforms

- Git / GitHub

TARGET

Final-year Computer Science student with hands-on experience in computer vision and deep learning (object detection, OCR, image classification). Seeking an internship in AI/Software Development to apply my technical foundation to real-world projects, strengthen practical problem-solving skills, and contribute to a team building production-ready solutions.

EDUCATION

Industrial University Of Ho Chi Minh City

09/2022 - 09/2026

BACHELOR OF SCIENCE

Classification : Good

Faculty : Information Technology

Major : Computer Science

GPA: 3.0 / 4.0

TOEIC Certificate, IIG Vietnam - Score: 610

PROJECT

Industrial University Of Ho Chi Minh

09/2022 - 09/2025

Student

Natural Image Classification with ResNet50

- Built an 8-class image classifier using ResNet50 (PyTorch), fine-tuned via transfer learning from ImageNet-pretrained weights.
- Applied data augmentation (random flip, rotation) and a two-phase training strategy: frozen-backbone training followed by full fine-tuning at a lower learning rate.
- Achieved 99.16% validation accuracy, evaluated with confusion matrix analysis across all classes.
- Tech stack: PyTorch, torchvision, ResNet50, scikit-learn

Image Captioning using CNN + LSTM

- Designed an encoder-decoder image captioning model combining EfficientNetB7 (pretrained CNN feature extractor) with an LSTM-based sequence decoder.
- Built a full NLP preprocessing pipeline: text cleaning, tokenization, and sequence padding/generation with a custom Keras Sequence data generator.

- Visual Studio Code
- SQL Server Management Studio
- Kaggle, Google Colab
- Visual Paradigm, Draw.io

Soft Skills

- Communication
- Team Collaboration
- Presentation
- Time Management & Task Planning

- Trained the model on Flickr8k to predict captions word-by-word conditioned on image features and prior context.
- Tech stack: TensorFlow/Keras, EfficientNetB7, LSTM, sacrebleu
