

NGUYEN ANH HUY

Fullstack Developer | Frontend & Backend Engineering

0346674072 | nguyenanh Huy2004@gmail.com | Born 20/11/2004
Tan Binh District, Ho Chi Minh City | github.com/hyynee

PROFESSIONAL SUMMARY

Fullstack Developer with around 1 year of hands-on experience across 4 production environments, including fast-paced startups. Involved across the entire software development lifecycle — from gathering business requirements and designing databases, to developing Backend APIs, building Web/Mobile frontends, and deploying and maintaining production systems. Strong with ReactJS, React Native, TypeScript, Node.js, NestJS, FastAPI, Django, PostgreSQL/MySQL, Prisma ORM, Docker and Git, with solid understanding of system architecture, RESTful APIs, authentication, WebSocket, state management and application performance optimization. Actively integrates AI tools such as Claude, ChatGPT and GitHub Copilot into the daily development workflow to support solution design, requirement analysis, code review, debugging, performance tuning and overall productivity. Aiming to grow as a Software/Fullstack Engineer building large-scale products that deliver real value to users and businesses.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, SQL
Frontend	ReactJS, React Native, NextJS, Redux / Redux Toolkit, Zustand, TanStack Query, Tailwind, ShadCN, Ant Design, Vite
Backend	NestJS, Node.js, ExpressJS, FastAPI, Django, REST API, WebSocket, JWT / Passport, RBAC
Database / ORM	PostgreSQL, MySQL, MongoDB, Prisma, Mongoose, Redis
DevOps / Tools	Docker, Nginx, Vercel, Git / Git Flow, Postman, Jira
AI Engineering	Claude, ChatGPT, GitHub Copilot, OpenAI / LangChain, AI-assisted workflow integration
Methodology	Agile / Scrum, Clean Code, Code Review, Feature-Sliced Design

WORK EXPERIENCE

Fullstack Developer	04/2026 – Present
E-commerce Startup (confidential)	
- Contributed across the full stack of a production e-commerce platform within a 5–7 member team (PO, designers, developers), working from database design through deployment. - Designed and modeled the relational database schema for core commerce domains (users, products, orders, cart). - Built the backend authentication system with JWT (login, logout, refresh token) and role-based access for admin and customer. - Developed both the admin web dashboard and the customer-facing client web, with reusable UI components and centralized state management. - Implemented real-time customer chat/consulting and push notifications using WebSocket. - Handled performance optimization, deployment and CI/CD for the production system. Technologies: TypeScript, ReactJS, Node.js, NestJS, Vite, WebSocket, JWT	
Fullstack Developer	02/2026 – 04/2026
HANEXT TECHNOLOGY CO., LTD	
- Joined a startup product team, contributing directly to a real production system across the full stack — from database design and Backend APIs to Frontend implementation and deployment. - Participated in business analysis and translated product requirements into database schema, API contracts and UI flows. - Built and optimized RESTful APIs and frontend features following clean code principles and strong TypeScript typing. - Integrated AI tools (Claude, ChatGPT, GitHub Copilot) into the daily workflow for solution design, code review, debugging and faster delivery. Technologies: TypeScript, ReactJS, React Native, NestJS, Node.js, PostgreSQL, Prisma, Docker, Git	
Front/Backend Developer	09/2025 – 01/2026
WIN WIN EVENT TRADING & SERVICE CO., LTD	
- Worked closely with the backend team to define and integrate RESTful APIs. - Applied clean code principles and strong typing (TypeScript) to ensure code quality.	

- Optimized performance through efficient rendering and state management; implemented lightweight scalable state with Zustand.
 - Refactored and optimized custom hooks to improve maintainability and reusability; built responsive UI from Figma designs.
- Technologies: ReactJS, React Native, TypeScript, Redux, Git*

Intern Front/Backend Developer

06/2025 – 09/2025

TECHHAUS VIETNAM JSC

- Participated in backend API development using NestJS, working with MongoDB and MySQL.
- Wrote CRUD APIs and JWT validation; supported bug fixing and business logic optimization.
- Developed backend APIs with the Django framework and managed/optimized MySQL database operations.
- Worked following Git Flow with mentor-led code reviews.

Technologies: NestJS, Node.js, Django, Python, ReactJS, NextJS, TypeScript, MySQL, MongoDB, REST API, Docker, Git

PROJECTS

Full-Stack Ticketing System

Backend: github.com/hyynee/be-nestjs-web-ticket | Frontend: github.com/hyynee/ticket_web_frontend

- Designed modular backend architecture with domain-based modules (auth, booking, ticket, payment, zone).
- Implemented real-time seat reservation and ticket check-in using WebSocket.
- Built secure authentication & authorization (JWT, refresh token, Google OAuth2, RBAC) and integrated Stripe/PayPal for online payments.
- Applied Redis & queue system for async processing; developed an analytics dashboard for revenue and booking statistics.

Stack: NestJS, MongoDB, Redis, WebSocket, JWT, Passport, React, TypeScript, Redux, Ant Design, Vite, Docker, Nginx, Vercel

E-commerce Website – Shoes Store

github.com/hyynee/economence_shoes

- Built product listing, shopping cart and Stripe checkout; implemented registration/login with admin and user roles.
- Developed APIs with NestJS and managed global state with Redux Toolkit; built reusable UI components with optimized rendering.

Stack: ReactJS, Redux Toolkit, Tailwind, ShadCN, NestJS, Prisma, MySQL, JWT, Stripe

E-commerce Website – Clothing Store

github.com/hyynee/ecommerce

- Built a responsive modern UI with product management, shopping cart and PayPal payment; Redux auth slice protecting routes.
- Applied modular architecture, MongoDB indexing and query filtering, with environment security via dotenv and CORS.

Stack: ReactJS, Redux Toolkit, Tailwind, ShadCN, NestJS, MongoDB (Mongoose), JWT, Cloudinary, PayPal

EDUCATION

Sai Gon University

10/2022 – Present

Major: Information Technology

ADDITIONAL

Languages	English (professional working), Vietnamese (native)
Soft Skills	Teamwork, Problem solving, Communication, Critical thinking, Responsibility
Career Goal	Grow into a Software/Fullstack Engineer able to independently build and ship complete AI/SaaS products end-to-end.
