GitHub Profile

PROFILE

Final-year Software Engineering student focused on Backend Engineering and modern full-stack development. Experienced in building production-style applications using Spring Boot, React, RESTful APIs, relational and NoSQL databases, and real-time technologies across web and mobile platforms. Seeking Front-end or Back-end Developer Internship opportunities to contribute to real-world software projects and further develop technical skills.

EDUCATION

- Industrial University of Ho Chi Minh City** *Oct 2022 - Present*
Software Engineering GPA: 3.41/4.0

WORK EXPERIENCE

- Wareflex** *Jun 2026*
Software Engineering Intern Ho Chi Minh City, Viet Nam
 - **Project Overview:** Enhanced the core internal console application by integrating event tracking, feature management, and background automation engines.
 - **Responsibilities:**
 - * Deployed and integrated a local instance of **Inngest** with the console application to build multi-tenant, automation background workflows tailored per organization.
 - * Integrated **PostHog SDK** into the ecosystem to establish a reusable analytics foundation for tracking global page views, user identification, and custom operational events.
 - * Implemented centralized tracking services to streamline system event logging and feature flag management across the console UI.
 - * **Tech stack:** ReactJs, NestJs, **Inngest**, **PostHog**, JavaScript/TypeScript, Automation Workflows.
- TechVanguard** *March 2026 – Jun 2026*
Software Engineering Intern Ho Chi Minh City, Viet Nam
 - **Project Overview:** Developed an end-to-end internal HR system to streamline recruitment, candidate evaluations, and onboarding workflows.
 - **Responsibilities:**
 - * Built core onboarding modules and dynamic multi-step forms using **Next.js**, **TypeScript**, and **Tailwind CSS**.
 - * Designed a secure Admin Console featuring **cookie/session authentication**, route protection middleware, and advanced data filtering/search.
 - * Developed scalable **RESTful APIs** and service layers for candidate management, file uploads, and automated email workflows.
 - * Integrated relational business logic covering job positions, handover records, and end-to-end HR workflows with **MongoDB/Mongoose**.
 - * **Tech stack:** **Next.js**, **TypeScript**, Tailwind CSS, **MongoDB**, RESTful APIs.

PERSONAL PROJECTS

- Wisdom Books** *Dec 2025*
Full-stack Online Bookstore Management System
 github.com/NguyenTanNghi/wisdom-books
 - **Project Overview:** Developed a decoupled e-commerce platform for managing online bookstores, focusing on high-performance book cataloging, secure media storage, and a seamless administrative experience.
 - **Responsibilities:**
 - * Engineered advanced server-side search, filtering, and pagination using **Spring Data JPA** and **JpaSpecification** for optimized data retrieval.
 - * Integrated **AWS S3** for scalable multi-image storage and implemented a **soft delete mechanism** to maintain data integrity.
 - * Built a professional Admin UI with **Ant Design Pro**, featuring a **Rich Text Editor**, debounced search, and **URL-synchronized filtering** for enhanced UX.
 - * Standardized API communication using **MapStruct** for DTO mapping and a centralized **Axios client** with **interceptors** for error handling.
 - * **Tech stack:** **Java 21**, **Spring Boot 3**, MariaDB, **AWS S3**, **React 19**, **TypeScript**, Tailwind CSS.

• Wisdom Social

Present

Full-stack AI-Integrated Social & Messaging Ecosystem

 github.com/NguyenTanNghi/wisdom-social

- **Project Overview:** A comprehensive social networking platform featuring cross-platform clients (Web and Mobile), real-time communication, and AI-assisted workflows to enhance user interaction through messaging, voice/video calls, and smart content generation.
- **Responsibilities:**
 - * Integrated **AI Chat Completions** using **OpenRouter** to provide real-time **conversation summarization** and context-aware **smart reply suggestions** with a robust AI consent management workflow.
 - * Architected voice and video call signaling via **STOMP/WebRTC**, implementing a participant grid for web users and an **InCall Manager** for mobile devices to handle media streams.
 - * Developed a **hybrid persistence strategy** using **MariaDB** for relational identity data and **MongoDB** for high-volume social content such as posts, stories, and messages.
 - * **Tech stack:** **Java 21**, **Spring Boot 3**, **Redis**, **MongoDB**, **WebSocket**, **WebRTC**, **React 19**, **Expo (React Native)**, **OpenRouter AI**.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript

Frameworks: Spring Boot, ReactJS, ReactNative, ExpressJS, NextJS

Databases:MySQL, MongoDB

Technologies : RESTful APIs, WebSocket, WebRTC, GitHub

Cloud/Dev Tool: AWS S3, Git, GitHub, Postman

AWARDS

•Academic Encouragement Scholarship – **IUH**

2023, 2025, 2026
