EDUCATION

Saigon University of Technology 2023 - 2027

Major: Software Engineering

Third-year student

SKILL

FRONT-END:

HTML, CSS, JavaScript, Bootstrap 5

BACK-END:

C++, C#, Java, ASP.NET Core

DATABASE:

SQL Server

TOOLS:

- Microsoft Visual Studio, Visual Studio Code, Apache NetBean.
- SQL Server Management Studio, GitHub.
- Microsoft Word, Excel, Canva.

INTERESTS

- Learning new technologies
- Participating in activities that improve logical thinking

OBJECTIVE

I am a 3rd year student majoring in Software Engineering at Saigon University of Technology, I have a solid foundation in C#, OOP, ASP.NET Core, database design and good algorithmic thinking. I regularly use AI tools (ChatGPT, Claude, Gemini, Stitch) to support learning and speed up the coding process, and would like to be trained to apply AI more deeply - from integrating AI Model to building AI Tool/Agent - to create real products with users. I am proactive, eager to learn and always interested in user experience, not just writing code.

WORK EXPERIENCE

LANDING PAGE SẢN PHẨM

October 2025 - September 2025

NUMBER OF MEMBERS: INDIVIDUAL

Overview: Design and build product introduction landing pages, using AI tools (ChatGPT, Claude) to support coding, optimize interface and shorten development time.

Technology used:

- Frontend: HTML5, Tailwind CSS, JavaScript.
- Tools & Environment: Node.js (Build-tool), Git/GitHub, Visual Studio Code.
- Deployment: Deploy on Vercel.

Responsibilities:

- Come up with ideas, design the interface and build a complete landing page.
- Use AI to speed up code writing, debugging, and optimize user experience.
- Research and adjust the interface to be user-friendly.

FOOD WAREHOUSE MANAGEMENT SYSTEM

May 2026 - June 2026

POSITION: TEAM LEADER

Number of members: 3 people

Overview: Build a tour booking website with a static web model, using localStorage to simulate the database, manage users and tour booking flow. Gemini application project to optimize functional logic development and use Stitch to design interfaces, helping to shorten product completion time.

Technology used:

Fronted: HTML/CSS/JavaScript, Bootstrap 5

Hosting: Render

Tools: Git/Github, Visual Studio Code.

Responsibilities:

- Design the entire website's UI/UX interface using Stitch.
- Develop Login, Register, Admin/User authorization and Booking features, with logic built and optimized through Claude AI.
- Coordinate the team, integrate the system and deploy the website to the Render platform.
