

NGUYEN HUY QUOC

Fresher Backend Developer

0858 475 289 | huy118982@gmail.com | Hanoi, Vietnam
github.com/Quocqr

SUMMARY

Fresher Backend Developer with internship experience building enterprise features using Spring Boot and Angular. Proficient in RESTful API design, JWT/OAuth2 authentication, RBAC, and relational databases. Seeking a backend role to contribute to production-grade systems.

EDUCATION

Hanoi Open University
Bachelor of Information Technology

2022 – 2026
GPA: 3.0/4.0

TECHNICAL SKILLS

- **Programming Languages:** Java, C#, Kotlin, JavaScript, TypeScript
- **Backend:** Spring Boot, ASP.NET Core Web API, RESTful API, JWT, OAuth2, RBAC, BCrypt
- **Frontend:** Angular, ReactJS, Tailwind CSS, Bootstrap
- **Databases & Cache:** MySQL, SQL Server, MongoDB, Redis
- **Tools:** Git, GitHub, GitLab, Postman, Swagger, Firebase, Cloudinary, PayOS

WORK EXPERIENCE

GM Solutions — Developer Intern
Backend Developer (On-site, Outsourcing)

Jan 2026 – Present
Hanoi, Vietnam

Project: Public Investment Management System | Spring Boot, Angular

- Develop CRUD screens, integrating Angular UI components and corresponding Spring Boot backend APIs.
- Produced technical documentation and participated in debugging and feature improvement.
- Collaborated with team members to deliver assigned task on schedule.

PROJECTS

Restaurant Management Website

Sep 2025 – Oct 2025

Backend Developer | Spring Boot, MySQL, JWT, BCrypt, Google OAuth2, Cloudinary, PayOS

- Built RESTful APIs for product, order, reservation, and customer management modules.
- Implemented JWT authentication, BCrypt hashing, and RBAC for ADMIN, STAFF, and CUSTOMER roles.
- Integrated Google OAuth2, Cloudinary image storage, and PayOS payment; applied Adapter and Facade patterns for maintainable payment integration.
- github.com/Quocqr/Manager_Restaurants-be-main

Web Sales Application

Jun 2025 – Nov 2025

Fullstack Developer | ASP.NET Core Web API, ReactJS, SQL Server, Redis, JWT, OAuth2, RBAC

- Designed and implemented APIs for product management, order processing, and authentication.
- Secured the application with JWT, OAuth2, and RBAC; used SQL Server and Redis for storage and caching.
- github.com/Quocqr/shoe_sales_website

Movie Website

Apr 2025 – May 2025

Frontend Developer | ReactJS, Bootstrap, Public API

- Built a movie-browsing interface with ReactJS; integrated public APIs for film listings and detail pages.
- github.com/Quocqr/web_xem_phim
