

LÊ QUỲNH ANH

AI Engineer Intern

• (+84) 853 129 258 • lequynhanh010706@gmail.com • github.com/quynhanh0107

PERSONAL STATEMENT

I am currently a final year student in Computer Science and Engineering at University of Oulu, Finland. With my interest in Machine Learning and Artificial Intelligence, I have built projects like a natural language book recommendation system and learned core deep learning and NLP concepts — working hands-on with PyTorch, transformer models, and graph algorithms like Louvain and K-core. I'm looking to bring this hands-on skills and experience to the AI Engineer Intern role.

EDUCATION

University of Oulu

Bachelor of Science in Computer Science

August 2024 - August 2027

- Computer Science and Engineering (Digitalisation, Computing and Electronics, Bachelor and Master of Science (3y + 2y)
- GPA: 3.67/4.0

HNUE High School for Gifted Students

August 2021 - August 2024

- GPA: 9.5/10.0 SAT: 1500/1600 IELTS: 8.0 (C1)

EXPERIENCE

IT Intern

June 2025 - August 2025

VNPT NET – Digital Transformation Center
Hanoi, Vietnam

- Contributed in a real-world project development team in collaboration with the German inspection company TÜV Nord.
- Gained experience in workflow testing, validation, and automation practices.

PROJECTS

European Restaurant Network Analysis

March 2026 - May 2026

Course Project

- Designed and implemented a secure, HTTPS-based backend server API in Java to process, validate, and manage JSON-formatted astronomical observation data.

Book Recommender System

April 2026 - June 2026

Personal Project

- Built a smart book recommendation system that lets users search for books using natural language, combined with filtering by genre and emotional tone.

SKILLS

Programming Languages: Python (NumPy, Pandas, PyTorch), Java (OOP), C/C++.

- Tools: Microsoft Office, GitHub, Git.

Languages: English (Fluent)

Laboratory: Experience with data processing, training LLMs, handling database, data structures and algorithms.
