CAREER OBJECTIVE

An enthusiastic Computer Science student with a solid foundation in Node.js, React.js, and database management, looking to contribute to the team's Backend/Fullstack development projects. I am deeply eager to learn from experienced engineers and dedicate my technical skills to supporting the company in delivering high-quality, real-world products. My goal is to work hard, adapt quickly to the team's workflow, and progressively build the capability to handle complex end-to-end system challenges.

PROJECTS

01. Order Management System

Online Food Ordering and Table Reservation Platform
