SUMMARY

Third-year Computer Science student seeking AI Engineering internship opportunities. Experienced in building LLM-powered applications, fine-tuning language models with PyTorch and LoRA, and integrating AI services with Python APIs and microservice-based systems. Strong interest in applying machine learning and backend engineering to practical AI products.

EDUCATION

Ho Chi Minh City University of Science (HCMUS)

BSc in Computer Science; Major: Computer Vision and Smart Control

– Expected Graduation: 2027

– Current GPA: 8.2/10

Ho Chi Minh City, Vietnam

2023 – Present

PROJECTS

Banking AI-Agent (Customer Support Chatbot) – Solo Project

github.com/ntnhtinh205/banking-chatbot

FastAPI, gRPC, PyTorch, PEFT/LoRA, Ollama, Streamlit, Docker

- Independently designed and built a customer support chatbot system using a microservices architecture with FastAPI, gRPC, and Streamlit.
- Fine-tuned a Qwen large language model using PyTorch and PEFT/LoRA for banking intent recognition.
- Integrated an API Gateway with Ollama to generate natural, domain-specific responses for banking scenarios.
- Containerized and deployed the system using Docker Compose to streamline the operational workflow.

Online Video Conferencing Web App

github.com/ntnhtinh205/Conference_Zoom

React.js, Express.js, Socket.io, WebRTC, VideoSDK

- Contributed to the frontend and part of the backend in a team project building a Zoom-like web app with video calling, screen sharing, virtual backgrounds, chat, and file sharing.
- Integrated WebRTC and VideoSDK for real-time media streaming; used Socket.io to synchronize room state and messaging across participants.
- Implemented meeting recording, transcription, and AI-powered summarization after each session.

TECHNICAL SKILLS

Programming: Python, C/C++, SQL

Framework: FastAPI

Libraries: PyTorch, OpenCV, Unsloth

Database: MySQL, MongoDB

Tools: Git, Linux, Docker

Languages: Vietnamese (Native), English (Reading)
