

Nguyen Duc Duy

Full-stack Developer

☎ 0962768035 — ✉ nguyenducduy0783@gmail.com — 🌐 github.com/Duy2801 — 📍 Ho Chi Minh City

Summary

Software Engineering student passionate about Full-stack development, with hands-on experience building responsive web/mobile interfaces, RESTful APIs, realtime systems, and cloud-based applications. Seeking a Full-stack Developer role to contribute to scalable products and grow with an experienced engineering team.

Education

Industrial University of Ho Chi Minh City

Oct 2022 – Present

GPA: 3.3/4.0 — 100% Tuition Scholarship (2 semesters, Top 10%) — TOEIC 565

Projects

Image Processing Platform

Jun 2026

Role: Full-stack Developer

Team of 1

Tech: React, Redux, Node.js, AWS Lambda, API Gateway, SQS, S3, DynamoDB, AppSync, SES, Sharp, JWT, Serverless Framework

- Built a serverless image-processing platform with a React frontend and an AWS-based microservices backend.
- Designed a centralized API Gateway to route frontend requests to authentication, processing, and notification services.
- Implemented an asynchronous Lambda/SQS pipeline for resizing, filtering, watermarking, compression, and S3 storage.
- Added realtime progress updates, JWT authentication, signed export URLs, SES notifications, CloudWatch monitoring, and automated GitHub Actions CI/CD.

Travel Expense Management System

Feb 2026 – May 2026

Role: Full-stack Developer

Team of 1

Tech: NestJS, React Native, React, PostgreSQL, Prisma, Redux, Redis, Queue, AWS EC2

- Designed REST/CRUD APIs with NestJS, PostgreSQL, and Prisma for users, trips, members, expenses, and settlements.
- Implemented authentication, role-based authorization, request validation, Redis caching, and background queues.
- Developed mobile and web interfaces with navigation, Redux state management, responsive components, and API integration.
- Secured the system using refresh-token rotation with database transactions, Origin/Referer validation, and API keys; automated deployment to EC2 and Vercel.

Realtime Chat (Web + Mobile)

Apr 2026 – May 2026

Role: Full-stack Developer

Team of 1

Tech: React, React Native, NestJS, MongoDB, Redux, Redis, Queue, Socket.IO, AWS S3/EC2

- Developed web and mobile chat applications using Next.js, React Native, NestJS, and MongoDB.
- Built Socket.IO messaging with room management, presence tracking, message delivery, and reliable reconnection.
- Used Redis caching and background queues to improve performance and support asynchronous processing.
- Integrated validated S3 file uploads and secure media-management workflows; configured automated CI/CD deployment to EC2 and Vercel.

Skills

Languages/Frontend: JavaScript, TypeScript, Java, HTML/CSS, React, Next.js, React Native, Redux, Bootstrap, Tailwind CSS

Backend: Node.js, RESTful API Design, WebSocket/Socket.IO, JWT Authentication, MVC

Database: PostgreSQL, MongoDB, MySQL, Redis, DynamoDB, Prisma ORM

Cloud/Tools: AWS (Lambda, API Gateway, SQS, S3, SES, EC2), Docker, Git, GitHub Actions, Postman, Vercel
