SUMMARY

Software Engineering student (4th year, IUH) passionate about Fullstack and Backend development. Experienced in building scalable web applications, RESTful APIs, microservices, and real-time systems. Seeking a Fullstack Internship to apply my skills to real-world projects and grow in a professional development environment.

EDUCATION

Industrial University Of Ho Chi Minh City

Major: Software Engineering

Expected 2026

GPA: 3.1

PROJECTS

Cosplay outfit rental website

[Github BE](#)

Member: 1 (Personal Projects)

20 Sep 2025 – 24 Dec 2025

Role: Frontend & Backend Developer

Tech Stack: Next.js, Tailwind CSS, Nest.js, JWT, Zustand, Sepay, Cloudinary, SWR

Responsibility:

- Design and implement user authentication and authorization using JWT, refresh tokens, and password hashing.
- Develop core features including product management, shopping cart, rental orders, vouchers, search, and filtering.
- Implement product review and rating system with post-purchase validation and image uploads.
- Integrate SePay VietQR payment gateway with automated payment status tracking.
- Deploy frontend on Render & backend on Heroku

Member: 5 (Team Projects)

10 Apr 2026 – 4 Jun 2026

Role: Frontend & Backend Developer

Tech Stack: Next.js, Flutter, Tailwind CSS, NestJS, MongoDB, Socket.IO, JWT, Zustand, Groq AI, S3, GitHub Actions

Responsibility:

- Develop and maintain **group chat** features: create group, add/remove members, invite link/QR join, group settings, and system messages for group events .
- Build **group voice/video call** flow on web and mobile using WebRTC and Socket.IO realtime signaling.
- Implement **AI assistant** integrated into the chat app using Groq LLM with function calling — summarize group/1-1 conversations, search messages, and query user/friend data, file attachment support (PDF, DOCX, images)
- Deploy Backend to AWS EC2 and Deploy Frontend to AWS Amplify.
- Set up GitHub Actions pipeline for automatic backend deployment to EC2 on every git push to main.

Online Tour Booking Platform

[Github FE](#)

[Github BE](#)

Member: 5 (Team Projects)

22 Apr 2026 – 1 Jun 2026

Role: Frontend & Backend Developer

Tech Stack: Next.js, Tailwind CSS, Zustand, Spring Boot, Spring Cloud, Kafka, PostgreSQL, Redis, Stripe, SePay, JavaMail

Responsibility:

- Contribute to microservices (API Gateway, Booking, Payment, Notification) communicating via REST and Apache Kafka.
- Develop tour booking flow end-to-end: slot reservation, passenger info, voucher validation, history, and cancellation with Redis slot locking.
- Build checkout UI for Stripe, SePay (VietQR), and cash-at-office with countdown timeout and payment status polling.
- Implement Payment Service with multi-gateway strategy, state machine, Transactional Outbox, and Stripe/SePay webhooks.
- Integrate Notification Service for email alerts (OTP, booking confirmation, office instructions) and DLQ monitoring for failed payment/booking events.

SKILLS

Languages: JavaScript, TypeScript, Java, SQL (PostgreSQL, MongoDB)

Frontend: React.js, Next.js, Tailwind CSS, Zustand

Backend: Node.js, RESTful APIs, Spring boot

DB & Cloud: Postgresql, Mongodb, Redis, AWS

Tools & DevOps: Git, Docker, Github Actions (CI/CD) , Postman

English: TOEIC 560
