

NGUYEN DUC KHANH

Fresher Fullstack Developer

☎ 0856 015 345 | ✉ nguyenkhanh2561990@gmail.com | 🌐 <https://github.com/Duc-khanh>

PROFESSIONAL SUMMARY

Final-year IT student specializing in Fullstack Web Development with Java/Spring Boot & ReactJS. Built 2 fullstack projects, including an AI-integrated recruitment platform that cut CV screening time by 80%. Seeking a fresher opportunity to apply fullstack development and Agile teamwork skills to real-world projects.

TECHNICAL SKILLS

Languages	Java, TypeScript
Backend	Spring Boot, Spring MVC
Frontend	ReactJS, HTML5, CSS3, Tailwind CSS
Database	MySQL
Concepts	OOP, MVC, RESTful API Design
Tools & Environment	Git, GitHub, Postman, IntelliJ IDEA, VS Code, MySQL, Agile/Scrum

PROJECTS

CareerGo - Recruitment Platform <i>Fullstack Developer</i> 🌐 Backend 🌐 Frontend Tech Stack: Java, Spring Boot, ReactJS, MySQL, Spring Security, JWT, RESTful API, Gemini API Description: A comprehensive recruitment system that integrates AI to optimize CVs, provide personalized career roadmaps, and automate HR candidate-screening workflows. • AI-Driven Screening Optimization: Integrated the Gemini LLM API to perform semantic analysis on CV data, enabling HR to automatically extract skills and reduce manual screening time by 80% • Skill Analysis: Developed a matching algorithm between candidate profiles and job descriptions to automatically generate personalized learning roadmaps, helping bridge skill gaps and increase application success rates • Intelligent Job Search Workflow: Built a dynamic, filter-based job search module that delivers a seamless application experience through a responsive ReactJS interface • Advanced Security: Implemented Spring Security with JSON Web Tokens (JWT) to enforce robust role-based access control (RBAC) across Admin, HR, and Candidate modules, safeguarding sensitive user data	Ongoing Project
Football Field Rental Management System <i>Team Leader & Fullstack Developer (Team of 4)</i> 🌐 Backend 🌐 Frontend Tech Stack: Java, Spring Boot, ReactJS, MySQL, Spring Security, Hibernate/JPA, RESTful API Description: A centralized operations platform that lets pitch owners manage schedules and gives end-users a real-time booking experience. • Concurrency Handling: Resolved critical booking conflicts under high traffic by applying optimistic locking in JPA/Hibernate, ensuring data integrity for real-time booking operations • Operational Efficiency: Designed a comprehensive Admin Dashboard that automated the approval process, reducing manual processing time from 15 minutes to under 2 minutes • Professional Development Lifecycle: Led project delivery within a 2-month timeline using the Agile/Scrum methodology, and upheld high coding standards through rigorous GitHub pull-request and code-review workflows • Scalable Backend Architecture: Engineered standardized RESTful APIs with flexible search filters, ensuring high system throughput and a consistent user experience	September 2025 - October 2025

EDUCATION

IT Engineer – Fullstack Web Development Thanh Do University - IT Engineer CodeGym	2023 - 2027 GPA: 3.0/4.0
