CAREER OBJECTIVE

Software Engineer passionate about building scalable web applications and real-world products. Experienced in React, NextJS, Node.js, TypeScript, NestJS, RESTful APIs, and cloud deployment. Strong interest in software architecture, product development, system design, performance optimization, and modern engineering practices including Agile, testing, code reviews, and CI/CD.

TECHNICAL SKILLS

- **Frontend:** React, NextJS, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Backend:** Node.js, NestJS, FastAPI, RESTful APIs, Socket.IO.
- **Databases:** PostgreSQL, MongoDB, Prisma ORM, Redis.
- **Cloud & Infrastructure:** AWS EC2, Docker, Linux (Ubuntu), Cloudflare.
- **Software Engineering:** OOP, SOLID Principles, Design Patterns, Data Structures & Algorithms, System Design Fundamentals.
- **Development Practices:** Git Flow, Code Review, Agile/Scrum, Testing Fundamentals, CI/CD Concepts.
- **Tools:** Git, GitHub, Postman, VS Code, Docker.

PROJECTS

BandBuilder
Full-Stack Developer (Personal Project)

03/2026 – 06/2026

- **Description:** Designed and developed a full-stack AI-powered language learning platform supporting Web and Mobile applications, real-time communication, automated speaking assessments, and cloud deployment.
- **Tech Stack:** NextJS, React Native, TypeScript, Node.js, NestJS, PostgreSQL, Prisma, Redis, Socket.IO, Docker, AWS EC2.
- **Responsibilities:**
 - Designed and implemented end-to-end system architecture including frontend, backend APIs, databases, and cloud infrastructure.
 - Developed responsive web applications using NextJS, React, and TypeScript with focus on performance and user experience.
 - Built scalable backend services using Node.js, NestJS, PostgreSQL, Redis, and Socket.IO.
 - Designed and maintained relational database schemas using PostgreSQL and Prisma ORM.
 - Implemented authentication, user management, learning modules, and real-time communication services.
 - Improved application performance through Redis caching, optimized API workflows, and low-latency communication.
 - Containerized services with Docker and deployed production environments on AWS EC2.
 - Participated in testing, debugging, incident resolution, and performance optimization.
 - Created technical documentation, deployment guides, and API specifications.
 - Applied software engineering best practices including version control, code review, maintainability, and feature iteration.
 - Independently delivered the platform from requirements analysis, implementation, testing, deployment, and maintenance.
- **Links:** [Live Demo](#), [Frontend Code](#), [Mobile Code](#), [Backend Code](#).

- **Description:** Community learning platform enabling assignment sharing, discussions, messaging, notifications, and video communication between learners.
- **Tech Stack:** Flutter, NestJS, Firebase Cloud Messaging, OAuth2, Firestore, MongoDB, ZegoCloud.
- **Responsibilities:**
 - Developed user-facing application features and integrated backend services.
 - Implemented OAuth 2.0 authentication and Firestore-based real-time synchronization.
 - Integrated Firebase Cloud Messaging (FCM) for notification delivery.
 - Implemented messaging, voice calling, and video calling features using ZegoCloud.
 - Participated in testing, debugging, issue investigation, and performance improvements.
 - Collaborated within a 4-member Agile team using Git/GitHub workflows and project planning through Notion.

EDUCATION

Ho Chi Minh City University of Transport
Bachelor of Information Technology

10/2022 – 06/2026

- GPA: 3.22/4.0

SOFT SKILLS AND AWARDS

- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Logical Thinking, Adaptability, Continuous Learning.
- **Languages:** Vietnamese (Native), English (Intermediate), Japanese (Beginner).
- **Awards:**
 - Received 2 “Excellent” Academic Scholarships — Ho Chi Minh City University of Transport.
