

NGUYEN KHANG THINH

Tay Ninh Province, Vietnam

Email: thanhcwh@gmail.com | Phone: +84 797622131 | Date of Birth : January 25, 2003

Address: 1089, Quarter 3, Hoang Le Kha Street, Chau Thanh Town, Tay Ninh Province, Vietnam

PROFESSIONAL SUMMARY

Motivated **Frontend Engineer** with a strong background in Software Development (**ReactJS**, **React Native**, **Next.js**) and a passion for building high-performance, responsive web applications. Skilled in optimizing user experience (UX), debugging RESTful APIs, and translating design concepts into clean, scalable code. Efficient in Git workflow and Agile team environments, dedicated to delivering smooth and consistent user interfaces.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript/TypeScript
- **Frontend:** ReactJS, React Native, Next.js
- **Backend & APIs:** RESTful APIs, SQL Server, NodeJS
- **Tools & DevOps:** Git, GitHub, GitLab, Vercel, VS Code, Android Studio, Postman, Chrome DevTools
- **Cloud & Others:** OAuth2/JWT, API Testing, Performance Optimization

WORK EXPERIENCE

Software Engineering Intern – FPT Software (November 2024 - January 2025)

- Investigated and resolved software defects (frontend and backend) for enterprise systems, improving overall application stability.
- Debugged RESTful APIs and verified data flow between client and server, utilizing tools like Postman and browser DevTools.

- Documented bug reports, root causes, and technical solutions clearly for the engineering team using Agile/Scrum environments.

Freelance Technical Analyst & Developer – Self-Employed (March 2025 - August 2025)

- Collaborated directly with local transport clients to gather requirements, analyze business logic, and elicit specifications for a regional transit ticketing system.
- Formulated technical specifications (SRS), mapped user workflows, and defined integration requirements for secure JWT-based authentication and Role-Based Access Control (RBAC).
- Partnered with cross-functional team members to design and integrate real-time notifications via third-party APIs (Twilio SMS and Email services).
- Monitored real-time system integration with SignalR and evaluated SQL queries to eliminate database bottlenecks during high-concurrency ticket transactions.

PROJECTS

FPT University, Ho Chi Minh City, Front-end Developer, Capstone Project: S Crew Studio

Sep 2025 – Feb 2026

Link: <https://screwstudioweb.vercel.app> - demo web

Description: Developed a web-based studio booking platform for room rental and custom set design services, enabling users to browse studios, customize set concepts, and reserve time slots online.

- **UI/UX Implementation:** Built responsive, smooth, and interactive booking workflows from scratch using **ReactJS/Vite.js**, HTML5, and CSS3, ensuring a seamless user experience across multiple devices and web browsers.
- **API Integration:** Collaborated with the backend team to integrate **RESTful APIs** for real-time room availability tracking, custom service selection, and secure booking transactions.
- **Performance & SEO Optimization:** Optimized frontend performance, managed clean architecture, and implemented technical SEO best practices to drastically improve page load speed and user retention.
- **Agile & Team Collaboration:** Actively managed development sprints and cross-functional tasks using **Jira**; participated in code reviews to maintain code quality and minimize technical debt.
- **Git Workflow Management:** Utilized **Git** for version control within the team, expertly handling code branching, reviewing pull requests (PRs), and resolving merge conflicts to ensure repository stability.
- **AI Tool Leverage:** Efficiently utilized modern AI development tools (GitHub Copilot, Claude) to accelerate UI prototyping, optimize repetitive component logic, and enhance troubleshooting efficiency.

FPT University, Ho Chi Minh City, Frontend Developer & Integration Specialist, Interprovincial Bus Ticket Sales System

April 2025

BE: https://github.com/nkthinh/Spring2025SWD392_3W_Group3_IBTSS_BE.git

- **Frontend Authentication Integration:** Integrated complex Identity workflows on the **ReactJS** frontend, including JWT-based authentication, multi-factor authentication (OTP), and strict Role-Based Access Control (RBAC) across Admin, Staff, and Customer panels.
- **API Testing & Debugging:** Conducted frontend-to-backend API integration testing utilizing Swagger for ASP.NET Core Web APIs, ensuring seamless data flows for booking, payment, and transaction modules.
- **Real-time Communication:** Implemented and monitored real-time communication stability using **SignalR**, successfully isolating and resolving bugs related to asynchronous data updates on the client-side UI.
- **Third-Party API Handling:** Handled and troubleshoot data flows from third-party integrations, specifically with Twilio API (SMS) and Email services for instant notification delivery on the user interface.
- **Git Collaboration:** Managed code branching, resolved complex **Git merge conflicts**, and maintained high repository stability within a 5-member development team.

EDUCATION

FPT University – Ho Chi Minh City, Vietnam (Oct 2021 – Feb 2026)

Bachelor of Software Engineering

- **Relevant coursework:** Web Development, Software Architecture, Database Systems, Computer Networks, Information Security.
- **Academic Highlight:** Gained deep hands-on experience in building responsive web applications with ReactJS, executing frontend-to-backend API integration, and version control management (Git) through major capstone projects.

CERTIFICATIONS

- User Experience (UX) Design & Responsive Web Specialization (University of Michigan | Coursera)

Verify link: <https://coursera.org/share/a4d3a5526cb3c78a6a9a0da88af85ea2>

- Agile Software Development & Quality Engineering (University of Minnesota | Coursera)

Verify link: <https://coursera.org/share/8e8371eb4ab4dd8c44c4ea1972588be2>

ADDITIONAL INFORMATION

Languages: English (Professional Working Proficiency - Strong in Reading & Writing Technical Documentation), Vietnamese (Native).

Technical Skills & Tools: Proficient in leveraging AI tools (Claude, GitHub Copilot) to accelerate UI prototyping and coding efficiency; experienced in managing tasks and sprints via Jira.

Soft Skills: Problem-solving, Agile Team Collaboration, Technical Troubleshooting, Customer-centric mindset.

Interests: Calisthenics/Street Workout, exploring scalable frontend architectures and modern UI/UX trends.
