

Nguyễn Tuấn Khôi

Backend Developer

Ha Noi, Vietnam • tuankhoi3011@gmail.com • 0343 211 378 • ziq3

Projects

Xiangqi Online

- Developed a **multiplayer Xiangqi game server** in Java and Spring Boot, supporting PvP and PvAI matchmaking
- Engineered low-latency synchronization of board moves, game timers, and live AI analysis using **Server-Sent Events** (SSE) via Spring SseEmitter
- Integrated the **Pikafish engine** on the backend to provide bot play and live analysis board features
- Implemented secure user authentication by verifying **Supabase Auth** JWTs within **Spring Security**
- Managed relational data storage for match histories utilizing **PostgreSQL** and **Spring Data JPA**
- Source: github.com/ziq3/xiangqi
- Demo: xiangqi-production-937b.up.railway.app

Warehouse Management System

- Developed a **Warehouse Management System (WMS)** using Java, Jakarta Servlets/JSP, and JSTL
- Engineered inventory, import/export, and auditing modules using a **MySQL** database with the **JDBC/DAO pattern**, incorporating **Role-Based Access Control (RBAC)** for secure Manager and Staff privileges.
- Source: github.com/TuanNam1121/WHMSystem

Awards

Codeforces Competitive Programming

- Achieved a Max Rating of 1722, placing in the top 5% of active users
- Profile: codeforces.com/profile/tkhoi123
- Language: C++

Provincial Olympiad in Informatics

Oct 2024

- Awarded Second Prize
- Language: C++

Winner of Codefest

Nov 2024

- Developed an autonomous **Java** game bot to execute real-time tactical actions under constrained response times
- Designed a dynamic **decision-making algorithm** to evaluate in-game entities (e.g., items, enemies) using a weighted scoring system based on distance utility, item rarity, and combat advantage

Education

FPT University, Software Engineering

- Awarded a 100% scholarship for 4 years

Skills

Languages: Java, SQL, C++

Spring Framework: Spring Core, Spring Security, Spring Data JPA, REST APIs

Databases: PostgreSQL, MySQL

Tools: Git, Postman, Docker
