## EDUCATION

Computer science  
International university

2023-2027

## SKILLS

- Programming Languages: Java, Go, SQL, JavaScript
- Database: MySQL
- Concepts & Tools: gRPC, Concurrency, RESTful APIs, Git/ Github, VSCode

## LANGUAGE

English

Vietnamese

## About Me

Third-year Computer Science student at International University – VNU HCMC. Passionate about building robust backend systems, APIs, and managing databases. Experienced in developing server-side applications using Java (Spring Boot) and Go, with practical exposure to concurrency and gRPC. Eager to contribute to a backend team while expanding knowledge in system architecture and scalable software development.

## GAME DEVELOPMENT & ALGORITHMIC PROJECTS

**Hyperbid Web (Virtual Item Trading Platform) | Java, Spring Boot, MySQL, HTML/CSS/JS**

- Spearheaded the end-to-end full-stack development of a responsive e-commerce web application focused on virtual item trading.
- Designed database schemas using MySQL and managed robust backend transaction data flows via JPA/Hibernate.
- Built interactive HTML/CSS/JS front-end interfaces and seamlessly integrated them with the Spring Boot backend to handle user interactions.

**MangaHub | Go, gRPC, Gin, Cobra**

- Developed backend services for a CLI-based application, building routing structures and commands using Gin and Cobra frameworks.
- Implemented targeted broadcasting features for manga-specific notification rooms .
- Utilized gRPC and concurrency patterns in Go to handle efficient server communication and data flow.

**Maze Generator & Solver | Algorithm Implementation**

- Built an application that automatically generates unique, random mazes utilizing the Recursive Backtracker algorithm.
- Implemented efficient pathfinding logic to navigate and resolve complex grid structures.

## Additional Skills

Team Collaboration: Azure

Data analytic project: **CaloCola**

Adaptability: Quick to learn and apply new technologies, backend frameworks, and architectural patterns to meet dynamic project requirements.
